**BCC:** DCROOMPYN7661/ORD-NCEA-DC@EPA  
**Subject:** improving IRIS search capabilities for critical effect in IRIS  
**Attachments:** Critical effects\_Issues\_01-15-13.doc; iris\_pce\_export\_revisions.xls; iris\_precursor\_tumor\_export\_revisions.xls; IRIS\_Effects\_Summary\_DRAFT\_v1.pptx  
**Location:** DCROOMPYN7661/ORD-NCEA-DC@EPA  
**Start:** 1/31/2013 5:30:00 PM  
**End:** 1/31/2013 7:00:00 PM  
**Show Time As:** Busy  
  
**Recurrence:** (none)

This is an invitation to meet with SRA, the contractor that provides web support for IRIS, to discuss and hopefully reach decisions on enhancements to the critical effects search function in IRIS. Last summer SRA proposed a new framework that would organize all critical effects into organ systems. As you probably know, searches for critical effects are limited to the effect as described by the chemical manager. If, for example, you're interested in identifying all the chemicals with an RfD based on liver effects, you'd need to think of all the different terms that might describe liver toxicity and search separately for those effects. With the new framework, you'll be able to search by organ system.

Some of us met months ago to discuss the proposed framework, but we never completed the review and discussion. Audrey Galizia had dug into the work by SRA and has compiled organ systems used by other health agencies and identified other questions. See the attached file for discussion topics.

I'm extending the invitation to some others who have experience searching for critical effects or are knowledgeable about other health agency systems. If you can join in this conversation, that would be great!

Finally, I've set aside 90 minutes for this meeting, but don't expect to go beyond one hour, with another 30 minutes set added for a smaller group to follow up with SRA on any implementation decisions reached.

Get back to me with any questions!  
thanks,  
Sue
